Expertise relevant for this COST Action:	Characterization and study of the pharmacological properties of compounds obtained from plants as possible drug leads
Available facilities to conduct work, relevant for this COST Action:	Facilities to perform isolation and characterization of plant-derived compounds. Facilities to perform bioassays regarding antibacterial, anticancer and reversal of MDR (mediated by efflux pumps in cancer cells and yeast) activity.
Materials/Methods that could be shared with other members of this COST Action:	Bioguided Isolation and chemical characterization of plant-derived compounds. Biological tests for the study of activity and mechanisms of action (cytotoxicity, antibacterial tests, inhibition of MDR efflux pumps)

NOTE: By submitting this form to the Grant Manager of CA17104, I agree that this information can be used within the scope of this COST Action (e.g. may be included on the webpage of CA17104).
